LED CATALOGUE 2022

Second Edition

INTRODUCTION TO THE LED LIGHTING SYSTEM

DESCRIPTION

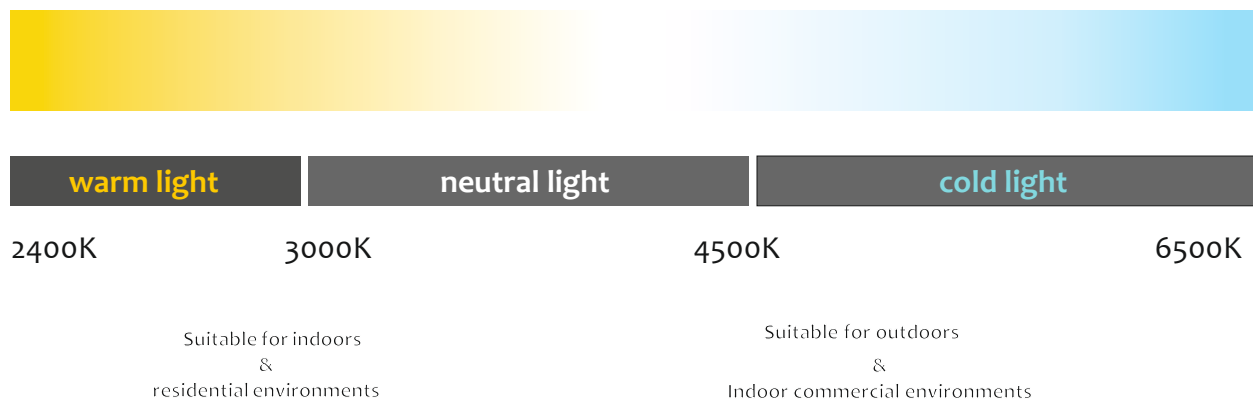

LED means Light Emitting Diode, it is nothing more than a small chip of semiconductor material that when it is crossed by an electric current in the appropriate direction, emits monochromatic light without producing hardly any heat, that is to say, a semiconductor electronic component with polarity, is used in signage, aesthetic functions and currently in lighting.

LED is the technology of the future in terms of lighting and also for environmental protection due to its low power consumption.

LIGHT TEMPERATURE

The color temperature of a light source is a way of comparing the whiteness of the emitted light. At low color temperature (typically 2400-3000° K) it gives a warm white yellowish color, the higher the color temperature, the cooler the light appears. Cool white has a temperature of 6000-7000° K.
Color temperature is measured in degrees Kelvin °K:

Warm white:	Color temperature between 2400K y 3000K, gives a warm white yellowish light color.
Neutral white:	Color temperature between 4000K y 5000K, gives a clean and pure white light color.
Cold white:	Color temperature between 6000K y 7000K, gives a cold white bluish light color.
RGB:	LED strips are the ones that gives different colors combining the primary colors Red Green Blue, hence the acronym. It is especially indicated in the decoration of different ambiances.

LUMEN

The lumen (symbol: lm) is the SI derived unit of luminous flux, a measure of the total quantity of visible light emitted by a source per unit of time. Luminous flux differs from power (radiant flux) in that radiant flux includes all electromagnetic waves emitted, while luminous flux is weighted according to a model (a "luminosity function") of the human eye's sensitivity to various wavelengths. One lux is one lumen per square metre.

Photometric

IP PROTECTION

It is the protection that the product has against the entry of dust and liquids.

The higher the IP protection, the better it will withstand water.

An IP45 product is perfectly recommended for lighting and interior decoration.

An IP68 product is completely waterproof, withstands humidity and immersion outdoors.

L212

Panel light surface strip (non visible LED dots).

Rechargeable battery operation. Includes USB cable for charger. Incorporates touch on-off sensor with dimmer and presence sensor.

Recommended use for lighting cabinets, showcases, drawers, countertops, and many more uses.

FINISH DEVICES

Ref.	Description	LED number	Color	Watts	Lumens	Packaging
L212.300	LED device 30cm lithium battery	80	●	2	180	3
L212.520	LED device 52cm lithium battery	120	●	3	220	3
L212.600	LED device 60cm lithium battery	160	●	4	360	1

Technical specifications

Type of LED	SMD 2216	Leds per meter	240	Voltage	5v	Watts	2-3-4w	Lumens	180-360
PCB	3mm	Color K	4000k	Angle	120°	CRI	>85	Life expectancy	30000 h

sc herrajes

L211

BVM

Very decorative surface profile with high luminosity.
Recommended for lighting showcases and shelves.
Available in black color, and all components for
tailored assemblies.

ASSEMBLED PROFILE

Ref.	Description	LED number	Color	Watts	Lumens	Packaging
L211.600	LED profile 60cm	72		7	780	3
L211.900	LED profile 90cm	108		11	1170	3
L211.1200	LED profile 120cm	144		15	1560	3
L211.2300	LED profile 230cm	276		28	3000	3

Available in special sizes and also with more powerful LED strips.

Technical specifications

Type of LED SMD 2835	Leds per meter 120	Voltage 12v	Watts per meter 12w	Lumens per meter 1300
PCB 8mm	Color K 2,4-6000k	Angle 120°	CRI >85	Life expectancy 30000 h

COMPONENTS L211

Ref.	Description	Packaged
L211.23	Kit profile + cover + caps of 2,3 meters	6

Recommended components for installation:

L144	Wireless kit
L144.5	Door sensor
L150.300	Extension cord

Installation of L211 profile + driver

The profile is installed with internal clips and screws included.

L210

BVM

Recessed profiles with and without edges, high luminosity with hidden light. Recommended for lighting showcases, closets, cabinets, etc.. Available in black or silver colors, and all components for tailored assemblies.

ASSEMBLED PROFILE

Ref.	Description	LED number	Color	Watts	Lumens	Packaged
L210.1000	LED profile 1,0mt	120		12	1300	3
L210.1500	LED profile 1,5mt	180		18	1950	3
L210.2500	LED profile 2,5mt	300		30	3250	3
L210a.1000	LED profile A 1,0mt	120		12	1300	3
L210a.1500	LED profile A 1,5mt	180		18	1950	3
L210a.2500	LED profile A 2,5mt	300		30	3250	3

Available in special sizes and also with more powerful LED strips.

Technical specifications

Type of LED SMD 2835	Leds per meter 120	Voltage 12v	Watts per meter 12w	Lumens per meter 1300
PCB 8mm	Color K 2,4-6000k	Angle 120°	CRI >85	Life expectancy 30000 h

COMPONENTS L210

Ref.	Description	Packaged
L210.2500p	Silver kit profile + cover 2,5mt Kit	6
L210.2500pn	Black kit profile + cover 2,5mt Kit	6
L210a.2500p	Silver kit profile + cover 2,5mt Kit	6
L210a.2500p	Black kit profile + cover 2,5mt Kit	6

Recommended components for installation:

L144	Wireless kit
L144.5	Door sensor
L150.300	Extension cord

Installation of L210 profile + driver

The profile is installed recessed with pressure or with adhesive.

L209

BRVM

Surface profile specially designed to illuminate 8mm thick glass shelves.
Available in black color, and all components for tailored assemblies.

ASSEMBLED PROFILE

Ref.	Description	LED number	Color	Watts	Lumens	Packaged
L209.1000	LED profile 1,0mt	120		12	1300	3
L209.1500	LED profile 1,5mt	180		18	1950	3
L209.2000	LED profile 2,0mt	240		24	2600	3

Available in special sizes and also with more powerful LED strips.

COMPONENTS L209

Ref.	Description	Packaged
L209.2000pn	Black profile kit + cover 2,0mt	6

Technical specifications

Type of LED SMD 2835	Leds per meter 120	Voltage 12v	Watts per meter 12w	Lumens per meter 1300
PCB 8mm	Color K 2,4-6000k	Angle 120°	CRI >85	Life expectancy 30000 h

L208

BRVM

Profile specially designed for wooden shelves to illuminate both, up and down.
Available in black color, and all components for tailored assemblies.

ASSEMBLED PROFILE

Ref.	Description	LED number	Color	Watts	Lumens	Packaged
L208.1000	LED profile 1,0mt	120		12	1300	3
L208.1500	LED profile 1,5mt	180		18	1950	3
L208.2000	LED profile 2,0mt	240		24	2600	3

Available in special sizes and also with more powerful LED strips.

COMPONENTS L208

Ref.	Description	Packaged
L208.2000pn	Black profile kit + cover 2,0mt	6

Recommended components for installation:

L144	Wireless kit
L144.5	Door sensor
L150.300	Extension cord

L206

3,5MM

Surface profile with high light intensity and non visible LED dots, highly decorative. Its main characteristic is the reduced dimension of the light beam. Recommended use for lighting showcases, cabinets, and so on. Available all components for tailored assemblies.

ASSEMBLED PROFILE

Ref.	Description	LED number	Color	Watts	Lumens	Packaged
L206.1000	LED profile 1,0mt	120	●	10	1200	3
L206.1500	LED profile 1,5mt	180	●	15	1800	3
L206.2000	LED profile 2,0mt	240	●	20	2400	3

Available in special measures.

Installation of profile L206

The profile is installed with metal clips included with the caps.

COMPONENTS L206 Ref.

Description	Packaged
L206.20 Silver profile kit + cover + caps 2mt	6

Technical specifications

Type of LED SMD 2216	Leds per meter 240	Voltage 12v	Watts per meter 10w	Lumens per meter 1200
PCB 3,5mm	Color K 5000k	Angle 120°	CRI >85	Life expectancy 30000 h

L206r

3,5MM

Surface profile with high light intensity and non visible LED dots, highly decorative. Its main characteristic is the reduced dimension of the light beam. Recommended use for lighting showcases, cabinets, and so on. Available all components for tailored assemblies.

ASSEMBLED PROFILE

Ref.	Description	LED number	Color	Watts	Lumens	Packaged
L206r.1000	LED profile 1,0mt	120	●	10	1200	3
L206r.1500	LED profile 1,5mt	180	●	15	1800	3
L206r.2000	LED profile 2,0mt	240	●	20	2400	3

Available in special measures.

COMPONENTS L206r

Ref.	Description	Packaged
L206r.20	Silver profile kit + cover + cups 2mt	6

Installation of profile L206

The profile is installed by pressure or glued into the machined groove.

L203

10MM

Surface profile with high luminosity, specially design for 90 degrees corners. It can incorporate on-off touch sensor comes with a 1.4 mt cord.

Recommended to illuminate countertop work area, closets and so on.

Available in silver or black color, and all components for tailored assemblies, with or without touch sensor.

ASSEMBLED PROFILE

Ref.	Description	LED number	Color	Watts	Lumens	Packaged
L203.400	LED profile with touch sensor 40cm	48		5	520	3
L203.600	LED profile with touch sensor 60cm	72		7	780	3
L203.900	LED profile with touch sensor 90cm	108		11	1170	3
L203.1200	LED profile with touch sensor 120cm	144		15	1560	3
L203.2000	LED profile with touch sensor 200cm	240		24	2600	3
L203.2500	LED profile with touch sensor 250cm	300		30	3000	3

Available in special sizes and also with more powerful LED strips.

Technical specifications

Type of LED SMD 2835

Leds per meter 120

Voltage 12v

Watts per meter 12w

Lumens per meter 1300

PCB 10mm

Color K 2,4-6000k

Angle 120°

CRI >85

Life expectancy 30000 h

COMPONENTS L203

Ref.	Description	Packaged
L203.25	Profile kit + cover + caps 2,5mt	6
L203.2500p	Silver aluminium profile 2,5mt	6
L203.2500pn	Black aluminum profile 2,5mt	6
L201.2500c	Opal cover 2,5mt	6
L203.ts	Surface caps	6
L203.32	Sensor touch 32w	6

Recommended components for installation:

L136 6 connections transformer

L136.1 Door sensor

L150.300 Extension cord

Installation of profile L203 + driver

The profile is installed with included screws on the end caps, and when the profile is more than 1.5mt. long, with included metal clips.

L202

10MM

Depending on the used cover, this profile is for surface or recessed installation.
Available in silver color, and all components for tailored assemblies.

ASSEMBLED PROFILE

Ref.	Description	LED number	Color	Watts	Lumens	Packaged
L202.1000	LED profile 100cm	120		12	1300	3
L202.1500	LED profile 150cm	180		18	1950	3
L202.2000	LED profile 200cm	240		24	2600	3

Available in special sizes and also with more powerful LED strips.

COMPONENTS L202 SILVER

Ref.	Description	Packaged
L202.20	Profile kit 2,0 mt + cover + silver caps	6
L202.2000p	Silver profile 2,0mt	6
L201.2000c	Opal cover 2,0mt	6
L202.ts	Silver surface caps	6
L202.te	Silver recessed caps	6

Installation of profile L202

Surface profile are installed with metal clips included with the caps.

Technical specifications

Type of LED	SMD 2835	Leds per meter	120	Voltage	12v	Watts per meter	12w	Lumens per meter	1300
PCB	8mm	Color K	2,4-6000k	Angle	120°	CRI	>85	Life expectancy	30000 h

L200L

8MM

Depending on the used cover, this profile is for surface or recessed installation with no LED dots visible.
Available in silver color, and all components for tailored assemblies.

ASSEMBLED PROFILE

Ref.	Description	LED number	Color	Watts	Lumens	Packaged
L200L.1000	Recessed LED profile 100cm	120		12	1300	3
L200L.1500	Recessed LED profile 150cm	180		18	1950	3
L200L.2000	Recessed LED profile 200cm	240		24	2600	3

Available in special sizes and also with more powerful LED strips.

COMPONENTS L200L SILVER

Ref.	Description	Packaged
L200L.20	Kit 2mt silver profile + cover	6
L200L.500K	Kit 2 LED profiles + sensor	3
L200L.1000K	Kit 2 LED profiles + sensor	3

Installation of profile L202 + driver

The profile is installed by pressure or glued into the machined groove.

L201

19MM

Depending on the used cover, this profile is for surface or recessed installation .

It is possible to incorporate internal touch sensor.

Available in silver or black color, and all components for tailored assemblies.

ASSEMBLED PROFILE

Ref.	Description		LED number	Color	Watts	Lumens	Packaged
L201.1000	LED profile	100cm	60		6	650	3
L201.1500	LED profile	150cm	90		9	975	3
L201.2000	LED profile	200cm	120		12	1300	3
L201.2500	LED profile	250cm	150		15	1625	3

Available in special sizes and also with more powerful LED strips.

COMPONENTS L201 PLATA

Ref.	Description	Packaged
L201.20	Kit 2mt profile + cover + silver caps	6
L201.2000p	Profile 2,0mt silver	6
L201.2500p	Profile 2,5mt silver	6
L201.2000c	Opal surface cover 2mt	6
L201.2000cr	Opal recessed cover 2mt	6
L201.ts	Silver surface caps	6
L201.te	Silver recessed caps	6

COMPONENTS L201 BLACK

Ref.	Description	Packaged
L201.20n	Kit 2mt profile + cover+ black caps	6
L201.2000pn	Profile 2,0mt black	6
L201.tsn	Black surface caps	6
L201.ten	Black recessed caps	6

Technical specifications

Type of LED	SMD 2835	Leds per meter	60	Voltage	12v	Watts per meter	6w	Lumens per meter	650
PCB	8mm	Color K	2,4-6000k	Angle	120°	CRI	>85	Life expectancy	30000 h

L201e

19MM

Recessed profile.

It is possible to incorporate internal touch sensor.

Available in silver or black color, and all components for tailored assemblies.

ASSEMBLED PROFILE

Ref.	Description		LED number	Color	Watts	Lumens	Packaged
L201r.1000	Recessed LED profile	100cm	60		6	650	3
L201r.1500	Recessed LED profile	150cm	90		9	975	3
L201r.2000	Recessed LED profile	200cm	120		12	1300	3
L201r.2500	Recessed LED profile	250cm	150		15	1625	3

Available in special sizes and also with more powerful LED strips.

COMPONENTS L2012 SILVER

Ref.	Description	Packaged
L201r.20	Kit 2mt profile + cover + silver caps	6
L201r.2000p	Profile 2,0mt silver	6
L201r.2500p	Profile 2,5mt silver	6
L201.2000c	Opal surface cover 2mt	6
L201r.te	Silver recessed caps	6

Installation of profile L201r + driver

The profile is installed by pressure or glued into the machined groove.

L200

BVM

Depending on the used cover, this profile is for surface or recessed installation.
Due to its size it can be used to illuminate many different environments.
Available in silver or black color, and all components for tailored assemblies.

ASSEMBLED PROFILE

Ref.	Description	LED number	Color	Watts	Lumens	Packaged
L200.1000	LED profile 100cm	60		6	650	3
L200.1500	LED profile 150cm	90		9	975	3

L200r.2500pn	Profile 2,5mt black	6
L200r.ten	Black recessed caps	6

L114

12MM

High luminosity surface profile with just 5mm thickness.

It can incorporate on-off touch sensor, comes with a 1.4 mt cord.

Recommended to illuminate countertop, and many more environments.

Available in silver or black color, and all components for tailored assemblies, with or without touch sensor.

ASSEMBLED PROFILE

Ref.	Description	LED number	Color	Watts	Lumens	Packaged
L114.520	LED profile 52cm	60		6	780	3
L114.920	LED profile 92cm	108		11	1120	3
L114.2000	LED profile 200cm	240		24	2600	3

L114.2000st	LED profile with sensor 200cm	240		24	2600	3

Available in special sizes and also with more powerful LED strips.

Technical specifications

Type of LED SMD 2835

Leds per meter 120

Voltage 12v

Watts per meter 12w

Lumens per meter 1300

PCB 10mm

Color K 2,4-6000k

Angle 120°

CRI >85

Life expectancy 30000 h

COMPONENTS L114

Ref.	Description	Packaged
L114.20	Kit 2mt profile + cover + caps	6
L114.58	Surface caps	6
L114.35	Profile square	6
L114.15	Profile joint	6

Recommended components for installation:

L144	Wireless kit
L144.5	Door sensor
L150.300	Extension cord

Square and joint
does not join the LED strip

Installation of profile L144 + driver

The profile is installed with included screws on the end caps, and when the profile is more than 1.5mt. long, with included metal clips.

757

IQVIM

Bi-LED Gola profile, for decorative and drawers lighting.
To be installed in low cabinets.

Ref.	Description	Packaged
757.4000.06	White lacquered profile 4mt	10
757.4000.08	Black lacquered profile 4mt	10
757.4000.31	Silver anodized profile 4mt	10
757.4000.63	Dark gray lacquered profile 4mt	10
758.4000.31	Silver anodized profile 4mt	10
758.4000.08	Black lacquered profile 4mt	10

COMPONENTS

Ref.	Description	Packaged
757.31t	Silver caps	6
757.31r	Silver nook	6
757.31e	Silver corner	6
750.29	Fixing square	25
757.10	Lighting kit 1 mt	6
757.20	Lighting kit 2 mt	6
757.c	Opaque PC cover 2 mt	6

Installation sketch

758

IQVIM

LED Gola profile, special lighting for drawers.
To be installed in low cabinets.

752

BVM

Profile / handle for high cabinets, included lighting.

REGLETAS MONTADAS

Ref.	Description	Color	Packaged
752.16.4000.06	Profile R 16mm white	4mt	20
752.16.4000.08	Profile R 16mm black	4mt	20

L160.80

Ultra-thin aluminum LED spotlight, equipped with 12 SAMSUNG LEDs. It does not need machining for its installation.

Due to its high brightness, it is recommended to use it together with the L141 remote dimmer sensor to regulate the intensity and facilitate an easy operation.

Recommended to illuminate countertops, showcases, ceilings, and so on.

Available in kits for easy installation.

TIPS FOR THE CORRECT ELECTION OF YOUR LED STRIPS

1 - PCB

PCB quality is the fundamental factor to determine the duration and quality of the led strip. The led chips are mounted in a copper plate that runs through the strip. PCB main function is to transport the current through the thickness and width of the plate, the thicker and wider it is, the greater the amount of copper it has. The value of copper makes the PCB the first affected to reduce costs, so it is very easy to detect when a strip is low on copper, simply by its price.

2 - CHIPS

On the chips are mounted the diodes, which are the light emitters of the strip. The brand and manufacture of the led chips determines the amount of light and the duration of the strip. Reference brands such as Epistar, Everlight and Samsung offer the maximum guarantee of illumination and durability. A low quality LED has lower brightness, low CRI (producing dull or lifeless colors) and a high probability of failure, shortening its useful life. A high quality LED is between 30 to 50% brighter than a cheap one and also provides:

- * **High CRI level**, which provides us with more vibrant, deep and real colors.
- * **Greater color consistency**, there are no different tonalities between strips of the same type.
- * **Longer useful life**, duration close to that advertised in the specifications.

3 - Electronic resistors

The Led strips have small internal resistances that limit the current that reaches the Led diodes. In good quality LED strips, the resistors are calculated so that the LED current is ideal. However, low quality Led strips "make up" the use of poor quality chips by providing a higher current than ideal to make the Led diodes shine more, resembling more expensive strips, the problem is that the excess current makes that the strips deteriorate rapidly and reduce their luminosity and life drastically.

4 - Covering

A poor quality or deficient coating does not have the proper chemical protections to extend the life of the material used, so they cannot harden due to the effect of heat and produce cracks, reduce their transparency and can also turn yellow in color. a short time, due to the degradation of coverage. This can cause water and other elements to affect the electronics of the Led, causing failures. In good quality strips we can find a more durable, transparent, flexible coating with greater resistance to decoloration.

5 - Adhesive

Reducing cost can even affect the fixing glue on the back of the strips. A special 3M brand adhesive is used in high-quality strips, which is ideal for a reliable fixation on many surfaces. The cheap strips usually have a generic adhesive that with heat can melt and detach, offering a minimum adhesion capacity. Our strips always have the most suitable 3M adhesive for each model.

6 - Price

A very easy way to identify low quality strips is by their price, if it is well below the average, surely costs were lowered in some important technical aspect.

As we can see, the quality of each of the materials is paid for and has its importance both in lighting and durability of the strip

but is it necessary to always have the highest quality in Led strips? The answer is no, it depends 100% on the type of installation and functions of the Led strip. Not all projects require the same quality. Depending on the quality of illumination, amount of luminosity, hours of operation and place of installation of the Led strip, we will have to decide the type of chip, the density of diodes or the IP protection of our strip.

7 - Conclusions

Usually our Led strips are installed in furniture and on many occasions in kitchen furniture, this is a serious problem if the Led strip does not have the appropriate quality for this type of installation, replacing or changing the installed Led luminaires can involve a higher cost than the price of these.

LED STRIPS

L127

8MM

High quality flexible led strip, 3M mp300 adhesive that guarantees adherence even at high temperatures.

They incorporate a 1.40m cord with a male plug in terminal at each end.

Digital RGB installation

WIFI

LWLB1

Wi-Fi access port for RGB + CCT LED controllers, the lights can be activated with three different options simultaneously, with remote control with a mobile phone from the app and with voice through a smart speaker such as Amazon Alexa or Google assistant. Recommended for installations in kitchen and home furniture.

Ref.	Description	Voltage	Distance	Watts	Packaged
LWLB1	RF wifi port 2.4 Ghz Mono	5V	30mt		1unit
LW36s	Controller 2.4 Ghz RGB-W	12v/24v		144w	1unit
LW39s	Controller 2.4 Ghz	12v/24v		144w	1unit
LW36sa	Controller kit + mono control	12v/24v		144w	1unit

Recommended components for installation:

Ref.	Description	Watts	Packaged
L136.36	Transformer	36w	3
LW07	Single color control 4 zones		1
LW88	RGB controller		1
LWS1B	Mono surface controller		1
LWB1B	Mono wall controller		1

Smartphone APP Control; Two-way data communication
let you know the light status at any time

LWLS

Wi-Fi controller for single-color and RGB LEDs, the lights can be activated with three different options simultaneously, with remote control, with a mobile phone from the app, and with voice through a smart speaker such as Amazon Alexa or Google Assistant. Direct operation, no additional Wi-Fi port needed. Recommended for installations in kitchen and home furniture.

Ref.	Description	Voltage	Watts	Packaged
LW36w	Wifi LED controller RF 2.4 Ghz	12/24V	144W	1
LWL5	Wifi LED controller RF 2.4 Ghz	12/24V	180W	1

LWB1B

L136

LED transformer and sensor in one piece. Ultra-thin design with box for 6-10 LED connections and 1 sensor connection. Possibility of adapting a sensor head available in 4 models with different functions. Includes 2.0mt HV cord.

Ref.	Description	Voltage	Watts	Measurements (length, width, height)	Packaged
L136.24	24w LED transformer with 6 LED connections and 1 sensor connection	12V	24w	95 x 55 x 18	3
L136.36	36w LED transformer with 6 LED connections and 1 sensor connection	12V	36w	137 x 55 x 18	3
L136.60	60w LED transformer with 6 LED connections and 1 sensor connection	12V	60w	167 x 60 x 20	3
L136.100	100w LED transformer with 10 LED connections and 1 sensor connection	12V	100w	198 x 60 x 20	3
L136.1	IR on-off sensor				3
L136.2	IR door sensor				3
L136.2.2	IR double door sensor				3
L136.3	PIR presence sensor				3

Technical specifications

Voltage	12v	Temperature	25°	Frequency	50-90Hz	IP	20	Warranty	2 años
Input	170-240VAC	Max. work temperature	80°	Power factor	>0,5	Watts	24-100	Life expectancy	25.000 h

L134

LED transformer with direct connection to the network. Includes cord/s with terminal/s and 2.0mt HV cord.

Ref.	Description	Voltage	Watts	Measurements (length, width, height)	Packaged
L134.06	6w LED transformer 1 LED connection	12V	6w	61 x 37 x 57	3
L134.15	15w LED transformer 2 LED connections	12V	15w	77 x 46 x 67	3
L134.27	27w LED transformer 3 LED connections	12V	27w	83 x 50 x 72	3

Technical specifications

Voltage	12v	Temperature	-10°-40°	Frequency	50-90Hz	IP	20	Warranty	2 years
Input	100-240VAC	Max. work temperature	80°	Power factor	>0,5	Wattios	6-27	Life expectancy	25.000 h

L130

Small and large format power supplies
Includes 2.0mt HV cord.

Ref.	Description	Voltage	Watts	Measurements (length, width, height)	Packaged
L130.45.12v	Transformer LED 45w Ip20 + 1 conector	12v	45	95 x 40 x 25	3
L130.45.24v	Transformer LED 45w Ip20 + 1 conector	24v	45	95 x 40 x 25	3
L130.60.12v	Transformer LED 60w Ip20 + 1 conector	12v	60	110 x 45 x 25	3
L130.60.24v	Transformer LED 60w Ip20 + 1 conector	24v	60	110 x 45 x 25	3
L130.100.12v	Transformer LED 100w IP20	12v	100	130 x 48 x 26	3
L130.100.24v	Transformer LED 100w IP20	24v	100	130 x 48 x 26	3
L130.200.12v	Transformer LED 200w IP20	12v	200	195 x 48 x 29	3
L130.200.12v67	Transformer LED 200w IP67	12v	200	195 x 48 x 29	3
L130.200.24v	Transformer LED 200w IP20	24v	200	195 x 48 x 29	3
L130.300.12v	Transformer LED 300w IP20	12v	300	207 x 60 x 42	3
L130.300.12v67	Transformer LED 300w IP67	12v	300	207 x 60 x 42	3
L130.300.24v67	Transformer LED 300w IP67	24v	300	207 x 60 x 42	3

L131

NEW MODELS

LED transformer and sensor in one piece.
Ultra-thin design with box for 4-6 LED connections and 1 sensor connection.
Possibility of adapting a sensor head available in 3 models with different functions.
Includes 1.8mt HV cord.

Ref.	Description	Voltage	Watts	Measurements (length, width, height)	Packaged
L131.09	LED transformer 3 conexions	12V	9w	103 x 41 x 12	3
L131.15	LED transformer 4 conexions	12V	15w	129 x 41 x 16	3
L131.24	LED transformer 3+1 conexions	12V	24w	124 x 45 x 18	3
L131.36	LED transformer 4+1 conexions	12V	36w	144 x 50 x 18	3
L131.60	LED transformer 5+1 conexions	12V	60w	171 x 61 x 18	3
L131.30.24v	LED transformer 4 conexions	24V	30w	180 x 46 x 21	3
L131.1	Dimmer on-off sensor	12V	60w	14,5 diameter	3
L131.2	Door sensor	12V	60w	10 diameter	3
L131.2.2	Double door sensor	12V	60w	10 diameter	3

Technical specifications

Voltage 12v-24v

Temperature -10°-40°

Frequency 50-90Hz

IP 20

Warranty 2 years

Input 200-240VAC

Max. work temperature 80°

Power factor >0,5

Watts 9-300

Life expectancy 25.000 h

L132

NEW MODELS

LED transformer, ultra-thin design with one LED connection. The new models include sensor output and various connections. Includes 2 meter network cord and hv connector.

Ref.	Description	Voltage	Watts	Measurements (length, width, height)	Packaged
L132.15	LED transformer 1 connexion 15w	12V	15w	140,5 x 45,5 x 15,7	3
L132.20	LED transformer 1 connexion 20w	12V	20w	140,5 x 45,5 x 15,7	3
L132.30	LED transformer 6 connexions 30w	12V	30w	169,5 x 49,0 x 19	3
L132.45	LED transformer 6 connexions 45w	12V	45w	202,6 x 50,6 x 19	3
L132.90	LED transformer 6 connexions 90w	12V	90w	248,0 x 57,0 x 19	3
L132.45.24v	LED transformer 2 connexions 45w 24v	24V	45w	202,6 x 50,6 x 22,5	3
L132.80.24v	LED transformer 2 connexions 80w 24v	24V	80w	248,0 x 57,0 x 26,3	3

Technical specifications

Voltage	12v	Temperature	25°	Frequency	50-90Hz	IP	20	Warranty	2 years
Input	100-240VAC	Max. work temperature	80°	Power factor	>0,5	Watts	15-80	Life expectancy	25.000 h

L133

LED transformer and sensor in one piece. Ultra-thin design with box for 6 LED connections and 3 sensor connections. Includes an IR sensor head and 2 meter network cord with hv connector. Available 4 models of sensors with different functions.

Ref.	Description	Voltage	Watts	Measurements (length, width, height)	Packaged
L133.30	LED Transformer 30w 1 sensor	12V	30w	265 x 50 x 21	1

Technical specifications

Voltage	12v	Temperature	-10°-40°	Frequency	50-90Hz	IP	20	Warranty	2 years
Input	100-240VAC	Max. work temperature	80°	Power factor	>0,5	Watts	30w	Life expectancy	25.000 h

L144

Ultra-thin set of transformer + wireless sensor with 6 independent channels.
Includes remote control, HV cord to network and 6 LED connections.
4 different sensor options and sensor case to be recessed.

Ref.	Description	Watts	Measurements (length, width, height)	Packaged
Kit 20w 12v				
L144.20.4	Kit 20w transformer + sensor + IR dimmer controller	20	162x75x17	1
L144.20.5	Kit 20w transformer + sensor + door IR controller	20	162x75x17	1
L144.20.6	Kit 20w transformer + sensor + presence PIR controller	20	162x75x17	1
L144.20.7	Kit 20w transformer + sensor + Touch dimmer controller	20	162x75x17	1
Kit 60w 12v				
L144.60.4	Kit 60w transformer + sensor + IR dimmer controller	60	235x75x17	1
L144.60.5	Kit 60w transformer + sensor + door IR controller	60	235x75x17	1
L144.60.6	Kit 60w transformer + sensor + presence PIR controller	60	235x75x17	1
L144.60.7	Kit 60w transformer + sensor + Touch dimmer controller	60	235x75x17	1
Additional controlers				
L144.4	IR dimmer sensor controller		40x40x10	1
L144.5	IR door sensor controller		40x40x10	1
L144.6	Presence PIR sensor controller		40x40x10	1
L144.7	Touch dimmer sensor controller		40x40x10	1

Kit components:

- 1 Transformer
- 1 control box with 6 channels
- 1 remote control
- 1 Network cord 2 mt.
- 1 user manual

Technical specifications

Voltage	12v	Temperature	25°	Frequency	50-90Hz	IP	20	Warranty	3 years
Input	100-240VAC	Max. work temperature	80°	Power factor	>0,5	Watts	20-60	Life expectancy	30.000 h

L141

Wireless sensor with dimmer function, includes control with intensity adjustment from 0 to 100.
Includes cord to transformer and box with 6 LED connections.

Installation of remote dimmer sensor:

Ref.	Description	Voltage	Watts	Measurements (length, width, height)	Packaged
L141.72	Remote dimmer with 6 connections box	12-36v	96-280w	80x36x22	1
L141.65	Desktop controller				1
L141.85	Wall controller				1

Technical specifications

Voltage	12v-36v	Temperature	25°	Frequency	50-60Hz	IP	20	Warranty	3 years
Input	100-240VAC	Max. work temperature	80°	Power factor	>0,5	Watts	96-280	Life expectancy	30.000 h

L141

Wireless on-off sensor with 6 connections and dimmer function, includes control with intensity adjustment from 0 to 100.
Wireless PIR sensor with 6 connections.
Includes cord to transformer.

Installation of remote sensor:

Ref.	Description	Voltage	Watts	Measurements (length, width, height)	Packaged
L141.60	Touch dimmer remote sensor with 6 connections	12-24v	60w	60x60x12	1
L141.90	Touch dimmer remote sensor with 6 connections	12-24v	90w	90x60x12	1
L141.60pir	Presence remote sensor with 6 connections	12-24v	60w	60x60x12	1

Technical specifications

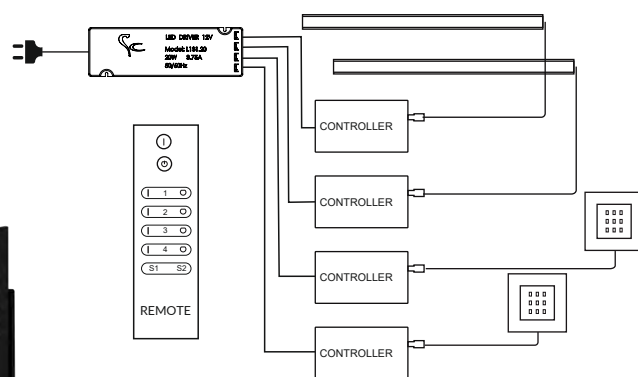

Voltage	12v-24v	Temperature	25°	Frequency	50-60Hz	IP	20	Warranty	3 years
Input	170-240VAC	Max. work temperature	80°	Power factor	>0,5	Wattos	60-90	Life expectancy	30.000 h

L145

Single color 4 zones controller with dimmer function and 2 scenarios.
Includes cord to transformer.

Controller installation in 4 zones:

Ref.	Description	Voltage	Watts	Measurements (length, width, height)	Packaged
L145.96	Mono color controller	12-36v	96-288w	80x36x22	1
L145.4	4-zones control with magnetic support			160x48x12	1

Technical specifications

Voltage	12v-36v	Temperature	20°-50°	Frequency	2,4Gz	IP	20	Warranty	3 years
Amps	8A	Max. work temperature	75°	Power factor	>0,5	Watts	96-280	Life expectancy	30.000 h

LW36

Monochrome controller for 1 or several zones, with dimmer function.
You can use 3 different surface or wall controls.
Includes cord to transformer.

Controller installation in 4 zones:

LW36sa

LWS1B

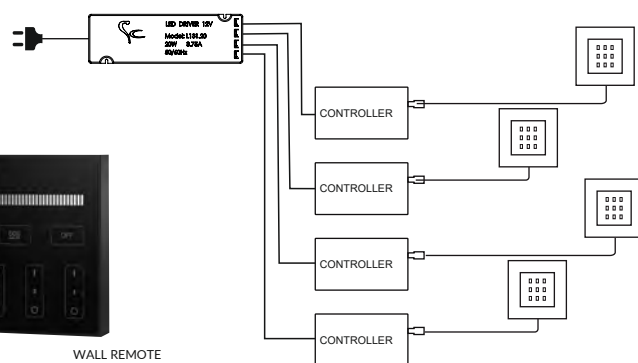

W07

LWB1B

WALL REMOTE

Ref.	Description	Voltage	Watts	Measurements (length, width, height)	Packaged
LW.36s	2.4Ghz monochrome controller	12-24v	144w	60x60x12	1
LW.36sa	Controller kit and monochrome remote 1 zone	12-24v	144w	60x60x12	1
LWS1B	Monochrome surface controller 1 zone			70x24	1
LW07	Monochrome surface controller 4 zones			110x53x21	1
LWB1B	Monochrome wall controller 4 zones			80x80x4	1

L142

Ultra-flat control box, with 5 different drive options.
With 6 LED connections and 3 sensor connections.

L142

L142.3

L142.4

L142.5

L142.6

L142.7

Control Box Installation:

Ref.	Description	Voltage	Watts	Measurements (length, width, height)	Packaged
L142	Control box	12V	60w	80x40x14	1
L142.3	IR on-off sensor + plugging cord				1
L142.4	IR dimmer sensor + plugging cord				1
L142.5	IR door sensor + plugging cord				1
L142.6	Presence PIR sensor + plugging cord				1
L142.7	Surface on-off sensor + plugging cord				1
L142.1	Box/box connection cable				1

Independent sensor, does not need a control box, with 3 different drive options.

L142.17

L142.18

L142.19

Sensor installation:

Ref.	Description	Voltage	Watts	Measurements (length, width, height)	Packaged
L142.17	Surface touch on/off sensor	12V	30	50x50x5	1
L142.18	Surface IR sensor 1 door	12V	30	50x50x5	1
L142.19	Surface IR sensor 2 doors	12V	30	50x50x5	1

Technical specifications

Voltage 12v-24v

Temperature 25°

Frequency 50-90Hz

IP 20

Warranty 3 years

Input 170-240VAC

Max. work temperature 80°

Power factor >0,5

Watts 30-60

Life expectancy 30.000 h

L143

Ultra-thin sensor, only 8mm in diameter, especially made to embed in the edges of the cabinets.

Available 3 models of sensors with different functions.

L143.36

L143 sensor installation:

Ref.	Description	Voltage	Watts	Diameter	Packaged
L143.36ir	IR on-off sensor 8mm	12v	36w	8mm	1
L143.36p	Door sensor 8mm	12v	36w	8mm	1
L143.36d	Double door sensor 8mm	12v	36w	8mm	1

Technical specifications

Voltage	12v-24v	Temperature	25°	Frequency	50-60Hz	IP	20	Warranty	3 years
Input	170-240VAC	Max. work temperature	80°	Power factor	>0,5	Watts	36	Life expectancy	30.000 h

L140

220v IR sensor. Includes cord with HV connector to the network and cord to the transformer.

L140.72

SENSOR

L141.32

L141.32n

L141.30

L108.72

L203.32

L140 IR sensor installation:

Ref.	Description	Voltage	Watts	Measurements (length, width, height)	Packaged
L140.72	IR Sensor 5cm	220v	250w	80x40x20	1
L141.32	IR sensor 12mm 6cm silver	12v	32w	12 diameter	1
L141.32n	IR sensor 12mm 6cm black	12v	32w	12 diameter	1
L141.30	PIR sensor 12mm presence 3mt distance	12v	32w	12 diameter	1
L108.72	Internal sensor double function touch/ door	12v	24w	12 diameter	1
L203.32	Internal touch sensor	12v	32w	10 diameter	1

Technical specifications

Voltage	12v-24v	Temperature	25°	Frequency	50-60Hz	IP	20	Warranty	3 years
Input	100-240VAC	Max. work temperature	80°	Power factor	>0,5	Watts	32-250	Life expectancy	30.000 h

L150

Cords with connectors and tinned tips for soldering, extension cables with male/female connectors.

L150.300

L150.48

L152.100

L152.35

L152.100a

L152.2

L152.6

L152.100i

L152.i

Ref.	Description	Watts	Packaged
L150.48	Connector cord for welding 50cm	72	3
L150.140	Connector cord for welding 140cm	72	3
L150.100	Extension cord 100cm	72	3
L150.150	Extension cord 150cm	72	3
L150.300	Extension cord 300cm	72	3
L150.100.rgb	RGB Extension cord 100cm	144	3
L152.100	Male welding cord 100cm	500	3
L152.35	Female welding cord 35cm	500	3
L152.100a	Extension cord 100cm	500	3
L152.2	Box 2 connections	500	3
L152.6	Box with 6 connections + switch	500	3
L152.6i	Cord with on-off switch	500	3
L152.i	On-off switch	500	3

L151

Quick connection box

Quick connectors to facilitate the assembly of LED strips.

L151.06t

L151.06

L151.140

L151.u

L151.d

L151.8

Ref.	Description	Voltage	Watts	Packaged
L151.06	Box of 6 connections with tinned cord for welding	12-24v	72	6
L151.06t	Box of 6 connections with terminal	12-24v	72	6
L151.8	Connector strip/cord 8mm to weld	12-24v	108	12
L151.140	Connector strip/cord 8mm 140cm	12-24v	72	12
L151.u	Connector strip/strip 8mm union	12-24v	72	12
L151.d	Connector strip/cord 8mm double	12-24v	72	12
